Scheduling

First impressions can make or break a referral or patient experience. Keep patient satisfaction high with a streamlined scheduling process that reflects your efficient practice. Setting appointments that meet the needs of your patients and practice is quick and simple thanks to the flexibility of the Medisoft Office Hours Professional scheduling solution.

Revenue Management

Ensure the accuracy of your claims before you submit them. Medisoft v17 allows you to verify patient eligibility and use pre-claim editing to review your filings for errors on the front end. You can dramatically reduce the number of returned claims that cost your practice time and money.

The revenue management solution translates and displays electronic remittance advice (ERA) in an intuitive window. The biller can efficiently review payment information, flag changes and post individual payments and adjustments.

Billing

Customizable rules-based grids allow you to generate claims that quickly and easily meet the filing requirements of different carriers. With that level of flexibility, your practice can manage virtually any claim submission. Medisoft v17 includes numerous enhancements to comply with the new ANSI 5010 standards.

"Medisoft is delivering a night and day difference in practice productivity. Paper and manual processes are eliminated. Electronic access to patient information is driving better patient care."

With BillFlash, you save time and money by uploading your patient statements directly from Medisoft. BillFlash will then print and mail your professional, patient-friendly statements. Learn more about the benefits of BillFlash at www.billflash.com.

Your Streamlined EHR Path

Accelerate and simplify your EHR implementation with a seamless upgrade to Medisoft Clinical. The combined EHR/practice management solution is designed to minimize the disruption to your practice when implementing an EHR. Medisoft Clinical can help provide a smooth and steady road to EHR.
