Support prices quoted are for Medisoft only
ALL PRICES QUOTED ARE SUBJECT TO CHANGE WITHOUT NOTICE.

MEDISOFT BACKUP OVERVIEW

It is imperative that you do regular backups, as data can be permanently lost without one

Click on 'File' 'Backup Data'

You will see a pop-up warning. All other computers need to close Medisoft, Office Hours and Revenue Management before you can back up the data. (Also close any connected EHR/EMR program) Click 'OK'

Click on 'Find'

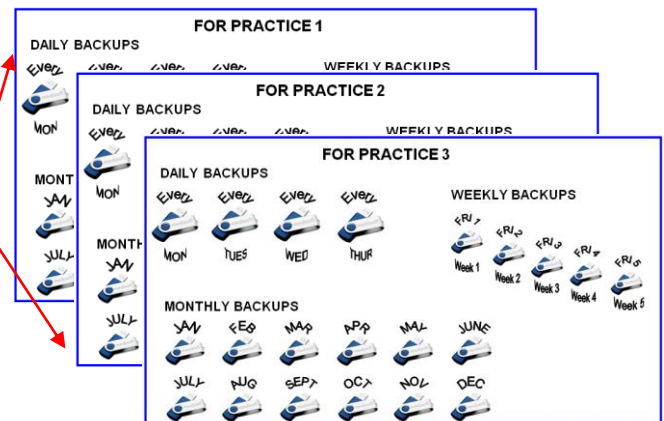

Browse to your backup USB, Hard Drive, etc. Click 'OK'

IMPORTANT: Medisoft remembers your previous settings, because of this it is easy to accidentally overwrite your last backup. Make sure you take out the file name every time you back up. To do so, backspace back to the first slash. For example remove 'mw11-20-2014.mbk'. Then click 'Start Backup'

Wait until the backup is completed. Click 'OK'

Your philosophy is to spread the risk across multiple media, this way your eggs are not all in one basket.

- ✓ REMEMBER TO BACKUP YOUR DATABASE DAILY
- ✓ ONCE A WEEK TAKE THE BACKUP OFF-SITE
- ✓ A GOOD PLACE TO STORE A MONTHLY BACKUP IS IN A SAFETY DEPOSIT BOX AT YOUR BANK

DETAILED INSTRUCTIONS AVAILABLE ON REQUEST
